

Multi-Blade Foam Cement Blending Assembly

Brand: OFI Testing Equipment, Inc.

Product Code: 124-00

Availability: Call for availability

Lead Time: 90

Description

The Multi-Blade Foam Cement Blending Container is designed to mix foam cement slurries. The stainless steel container fits on the [OFITE Constant Speed Blender](#). Inside, instead of a single set of blades, it contains a stack of five (5) sets of blades. The extra blades introduce significantly more air into the slurry as it mixes, creating a foam instead of the standard liquid slurry.
